Full-Stack Software Engineer

PROFESSIONAL SUMMARY

Full-stack software engineer with nearly 10 years of experience building SaaS platforms, enterprise applications, and mobile apps. Built analytics tools serving 300+ clients, with experience in secure authentication, multi-tenant architecture, and data visualization. Owns features from business requirements through frontend and backend implementation, testing, and release.

EXPERIENCE

3D Technical Designer

Kary Waves | New York, NY | June 2022 - Present

- Built a React Native/TypeScript app with Fastify, PostgreSQL, and AI voice dictation for client-linked project briefs.
- Added local SEO, structured business data, and a sitemap to help prospective clients discover garment services online.
- Create tech packs and 3D CAD garment simulations to assess fit, construction, and fabric drape before sampling.

Senior Software Engineer

Ai Media Group | New York, NY | March 2020 - August 2025

- Led React/TypeScript and Vue.js frontend modernization, migrating AngularJS admin workflows to Vue.js and helping launch Atrilyx as the company's client-facing SaaS analytics platform.
- Built AI-powered analytics dashboards backed by Node.js/REST APIs, delivering real-time cross-channel attribution and customer journey insights for 300+ clients logging 10M+ daily events.
- Conceived and owned a company-wide React/TypeScript SSO portal with JWT-authenticated access patterns and persistent drag-and-drop widgets for 120+ employees, reducing onboarding time by 40%.
- Architected multi-tenant data isolation for Atrilyx by redesigning schemas and enforcing client-scoped access controls for customers managing multiple site dashboards.
- Designed a scalable plugin system for Atrilyx with Vue.js components, Node.js API endpoints, and dedicated database schemas, enabling rapid feature expansion without disrupting core stability.
- Introduced Power BI into Atrilyx by engineering secure embed token auth, implementing row-level security across a three-tiered access model, and designing an internal permissions UI.

Technical Project Manager

Aetna | Hartford, CT | March 2018 - August 2019

- Led delivery of multiple concurrent Agile projects, owning Jira roadmaps and coordinating scrum teams from kickoff through successful production launch.
- Conducted HIPAA and PII compliance audits throughout the project lifecycle, identifying regulatory risks early and coordinating resolutions for audit-ready delivery.
- Bridged engineering, product, design, and executive stakeholders by translating business requirements into technical specifications and prioritization decisions.

Java Developer

Aetna | Hartford, CT | April 2017 - March 2018

- Contributed to migrating Aetna's backend architecture from a monolith to microservices within a 12-engineer scrum team, enabling parallel feature delivery and accelerating release speed by 75%.
- Implemented OAuth2 for sensitive customer PII in Aetna mobile app flows, enforcing secure token storage and background token refresh for uninterrupted sessions.
- Proposed a structured microservices migration plan with rollback checkpoints that addressed production-risk concerns and led to promotion into Technical PM ownership.

IT College Assistant

City University of New York | New York, NY | September 2013 - November 2016

- Provided campus IT support for students, faculty, and staff, including system re-imaging, hardware and software troubleshooting, and network issue resolution.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Java, SQL
Frontend: React, React Native, Expo, Vue.js, Angular
Backend: Node.js, Fastify, REST APIs, OAuth2, JWT
Databases: PostgreSQL, MySQL, MongoDB, Databricks
Cloud & DevOps: Microsoft Azure, AWS, Docker, CI/CD, Git
Testing & Tools: Jest, SuperTest, Selenium, Postman, Power BI

EDUCATION

Bachelor of Science in Computer Science and Applied Mathematics | Queens College | June 2016
